ABOUT US

Protecting people, property and continuity.

Established in March 2016, Phepha Fire and Security Integrators (Pty) Ltd t/a **PHEPHA FIRE** delivers integrated fire and security solutions for corporate, commercial, industrial, mining, warehousing, infrastructure and institutional environments. Our focus is dependable engineering, quality workmanship, responsive support and long-term client relationships.

WHY PHEPHA FIRE

At **Phepha Fire**, we understand that fire and life-safety systems are not simply equipment installations - they are critical systems designed to protect **people, property and business continuity**.

Our approach is built around **compliant design, quality workmanship, reliable technology and long-term lifecycle support**. Every solution is developed with careful consideration of the client's requirements, identified fire risks, applicable legislation and recognised standards, manufacturer specifications, and the actual conditions of the site.

We aim to provide our clients with more than a system - we provide **confidence that their fire and safety requirements are being addressed professionally and responsibly**.

Commitment to Our Clients

With 80+ years of combined industry experience across our directors and management team, we provide the expertise, resources and capacity to successfully deliver projects of any size and complexity.

Experience & Capability – Proven industry knowledge supported by skilled personnel and resources to deliver projects efficiently and professionally.

Compliance-Focused Solutions – Systems designed, installed, commissioned and maintained in accordance with applicable legislation, recognised standards and industry best practice.

Quality Workmanship – Professional installations with attention to detail from design through to final commissioning.

Reliable Technology – Proven equipment and technologies selected to suit each application and risk.

Risk-Based Approach – Solutions tailored to the building, occupancy, operational requirements and identified risks.

Lifecycle Support – Ongoing inspection, testing, maintenance, repairs and technical support.

Accountability – We stand behind the quality of our products, services and workmanship.

Warranty & Guarantee – New products and workmanship carry a **12-month warranty**, while repairs carry a **three-month guarantee**, subject to agreed terms and conditions.

We are committed to delivering **safe, reliable and compliant solutions backed by experience, capability and dependable service**.

OUR VISION

To become a trusted leader in fire and safety solutions in South Africa and beyond, recognised for excellence, integrity, innovation and an uncompromising commitment to safety.

We envision a future where every building, workplace and community we serve is better protected through effective fire prevention, early detection and dependable safety systems.

OUR MISSION

To protect lives, property and businesses by delivering reliable, compliant and innovative fire and safety solutions.

At Phepha Fire, we are committed to providing professional fire detection, prevention and safety services that meet recognised standards and give our clients confidence that their people and assets are protected.

OUR VALUES

Safety First • Integrity • Compliance • Professionalism • Quality • Reliability • Accountability • Innovation • Customer Focus • Teamwork

PRODUCTS & SERVICES

Integrated solutions designed around risk, operational needs and applicable requirements.

FIRE DETECTION & ALARM SYSTEMS

Comprehensive fire detection and alarm solutions, including conventional and addressable systems, automatic detection devices, manual call points, audible and visual notification, system monitoring, and seamless integration with building management and life-safety systems.

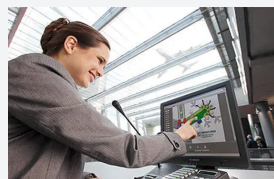

SPECIAL HAZARD FIRE SUPPRESSION SYSTEMS

Specialised fire suppression solutions, including system controls, detection, activation, and safety interfaces, carefully selected and engineered to suit the specific hazard, environment, and assets requiring protection.

FIREFIGHTING EQUIPMENT & FIRE RISK SERVICES

Comprehensive firefighting and fire risk management solutions, including portable fire extinguishers, hose reels, hydrants, and associated first-response equipment, complemented by professional fire risk assessments and tailored prevention strategies to protect people, property, and operations.

PA & VOICE EVACUATION SYSTEMS

Professional public address and voice evacuation solutions, including emergency messaging, paging, and automated evacuation announcements, designed to deliver clear, reliable, and controlled communication during routine operations and emergency situations.

ELECTRONIC SECURITY SYSTEMS

Integrated electronic security solutions, including CCTV surveillance, intruder detection, access control, and intercom systems, designed to provide comprehensive, layered protection for people, property, and assets.

NURSE CALL SYSTEMS

Reliable nurse call and communication solutions designed to enable rapid communication between patients and healthcare staff, supporting efficient response, enhanced patient safety, and effective care coordination.

LET'S PROTECT WHAT MATTERS.

For new projects, upgrades, maintenance
or fire and security assessments, contact
Phepha Fire for a professional solution.
